

MOHAMMED UZAIR

Al-Khobar, Eastern Province, KSA • +966-533933715 • mohammeduzairmulla@gmail.com • [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Motivated Computer Science Engineering graduate based in Al-Khobar, KSA, with hands-on experience in data analysis, business analytics, and client-facing project delivery. Proficient in Python, SQL, Power BI, and MS Office Suite (Excel, PowerPoint, Word). Demonstrated ability to translate data insights into actionable business recommendations across banking and hospitality sectors. Strong communicator with a commitment to professional development, team collaboration, and delivering measurable impact — aligned with values of integrity, inclusion, and client service excellence.

EDUCATION

Bachelor of Engineering – Computer Science
Visvesvaraya Technological University (VTU), Karnataka, India
CGPA: 8.3 / 10

Graduated: June 2025

High School – CBSE
International Indian School, Dammam, KSA

Dec 2021

PROFESSIONAL EXPERIENCE

Data Research Intern
Invergence Analytics Pvt Ltd., Hyderabad, India

Feb 2026 – Mar 2026

- Researched and collected structured datasets from multiple digital sources to support business analysis and client reporting workflows.
- Performed data validation, cleaning, and normalization to maintain high-quality, analysis-ready datasets.
- Organized and documented datasets for downstream analysis, contributing to team efficiency and report accuracy.
- Collaborated with senior analysts to align data collection efforts with client deliverable timelines.

Customer Churn Analytics – Menternship
MentorMind (Co-certified by Jupyter Bank)

Mar 2026 – Apr 2026

- Led SQL-based customer churn analysis on a banking dataset, identifying key churn drivers and at-risk customer segments.
- Designed and built an interactive Power BI dashboard featuring KPIs, trend analysis, and churn heatmaps for stakeholder presentation.
- Delivered data-driven recommendations projected to improve customer retention; presented findings to a panel of industry professionals.

AI-DevOps Trainee
Rooman Technologies (IBM Collaboration), India

Oct 2024 – Feb 2025

- Completed IBM-certified training in CI/CD pipeline design and automated deployment workflows.
- Gained practical exposure to DevOps practices including version control, containerization, and infrastructure automation.
- Collaborated in cross-functional team settings, developing strong communication and project management skills.

- Developed a Home Automation System integrating multiple IoT sensors with smartphone-based control — delivered ahead of schedule.
- Designed and analyzed real-time sensor data (temperature, gas detection) using Python, producing structured reports for technical stakeholders.
- Supported hardware/software troubleshooting and documented workflows to ensure knowledge transfer within the team.

KEY PROJECTS

Hospitality Data Analysis Dashboard | *Python, MySQL, Power BI*

- Analyzed hospitality booking data to uncover booking trends, revenue patterns, and customer behavior insights.
- Designed dashboard wireframes to define KPIs and visualization flow prior to implementation, ensuring alignment with business objectives.
- Produced an executive-facing Power BI dashboard enabling data-driven decisions on pricing and occupancy strategies.

E-Commerce Platform with Recommendation Engine | *Django, MySQL, Scikit-learn, Power BI*

- Engineered a full-stack e-commerce application with authentication, cart management, and order tracking modules.
- Built a Python/Scikit-learn recommendation system increasing simulated product discovery by surfacing personalized suggestions.
- Developed SQL-based KPI dashboards in Power BI to track user behavior and sales performance metrics.

Café Management System | *Python, SQL, MySQL*

- Designed an end-to-end software solution covering order management, inventory tracking, and staff scheduling.
- Implemented SQL backend to generate daily transaction reports, supporting operational decision-making.

TECHNICAL SKILLS

Programming: Python (OOPs), SQL

Data & Analytics: Exploratory Data Analysis (EDA), Data Cleaning, KPI Reporting, Trend Analysis, Business Analytics

Visualization & Reporting: Power BI, Tableau, MS Excel (Advanced), MS PowerPoint, MS Word

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Django

Databases: MySQL, PostgreSQL — schema design, query optimization, data modeling

Others : Git, Technical support, TCP/IP, OSI model, Chatgpt.

CERTIFICATIONS & ACHIEVEMENTS

- CI/CD Pipeline for Automated Deployments – IBM Certified
- AI-DevOps Engineer Certification – Rooman Technologies Pvt. Ltd. (IBM Collaboration)
- Advanced Certificate in Data Science (UpGrad)
- ISTE – Best Performing Student Chapter Award 2024

LANGUAGES

- English – Fluent (written and spoken)
- Arabic – Conversational
- Hindi / Urdu
